

*React Technologies...*  
**Aruba's Partner of the Year 2006**

**Would like to extend a big thank you to all of our customers**

Aruba's Mobile Edge System enables a new type of edge for the enterprise network — the mobile edge. The mobile edge allows users and devices to connect over the air and across any network, to securely gain access to enterprise resources.

The mobile edge is an evolutionary new architecture that delivers mobility, security and convergence for today's networks and builds on a vision where the enterprise network will ultimately have far fewer ports than today.

If you would like to know more about this award winning solution, or wish to join our rapidly expanding sales team, please contact:
